Offer for Development of Disk In Pro NEAR phase 2 web app

Overview

Founded 5 years ago in Bnei Brak, RavTech is a one-of-a-kind software house, providing a wide range of software services and specializing in Mobile, Web sites, IoT and Automation QA. With over 70 developers, all of which are excelled Talmudic college alumni, RavTech adds a unique value to its clients. This endeavor was launched by the Ultra-Orthodox community itself and is co-managed by some of Israel's top high-tech personas.

Our clients' portfolio includes multi-national companies such as Check Point, EMC, HP, City Bank and so on, as well as many early and late-stage startups.

We offer our customers a long-lasting partnership along with professional peace of mind throughout the entire software development life-cycle.

Our services include, among others, the following:

- Mobile end-to-end: native Android, native iOS, client & server architecture.
- Content Web sites and complex Web applications - client & server.
- IoT: Sensors connectivity and probing, embedded environment integration and communication.
- Dashboard & Monitoring: Javascript, Angular JS, HTML5, Python, PHP.
- Automation QA: planning automation testing frameworks - client-server, load, performance and more.
- ALM & DevOps: installation & upgrades, resource monitoring, Chef, Jenkins.
